# Homework Submission Guide

Machine Learning Class

March 4, 2016

Here are some instructions about homework submission. Please read it carefully before your submission.

## 1  When to submit

You can see the due date of every homework in the pdf file or the website. Please submit your homework **before** due date. If the due date is March 18, you should submit your homework before GMT+8 March 17, 2016 24:00

## 2  Where to submit

Your homework should be submitted directly through the website. If you encounter any problem about submission, please contact your TAs for help.

## 3  How to submit

The problems included in your homework can be roughly classified into two types: math problems and coding problems.

1. For the math problems, you are required to submit a .pdf with your solution in it. Please name the .pdf with **StudentID-StudentName-HomeworkID-math.pdf**.

   e.g. If this is the second homework, you should submit the file as **015033910032-YajingChen-hw2-math.pdf**.

2. For the coding problems, you are required to submit a compressed folder including your codes and a report of .pdf format. The compressed folder should be named as **StudentID-StudentName-HomeworkID-program.zip** *.zip preferred for no reason* :)

3. If your homework contains both math and coding problems, please create a folder with name as **StudentID-StudentName-HomeworkID** and put the math solution (.pdf) and coding solution (a folder) in it. Then, please upload the compression file (.zip) of the new folder through the website.

# 4 Questions

If you have any questions about homework submission, please send emails to your TAs.
